

BAKONY MASTERS

— Precision CNC Machining

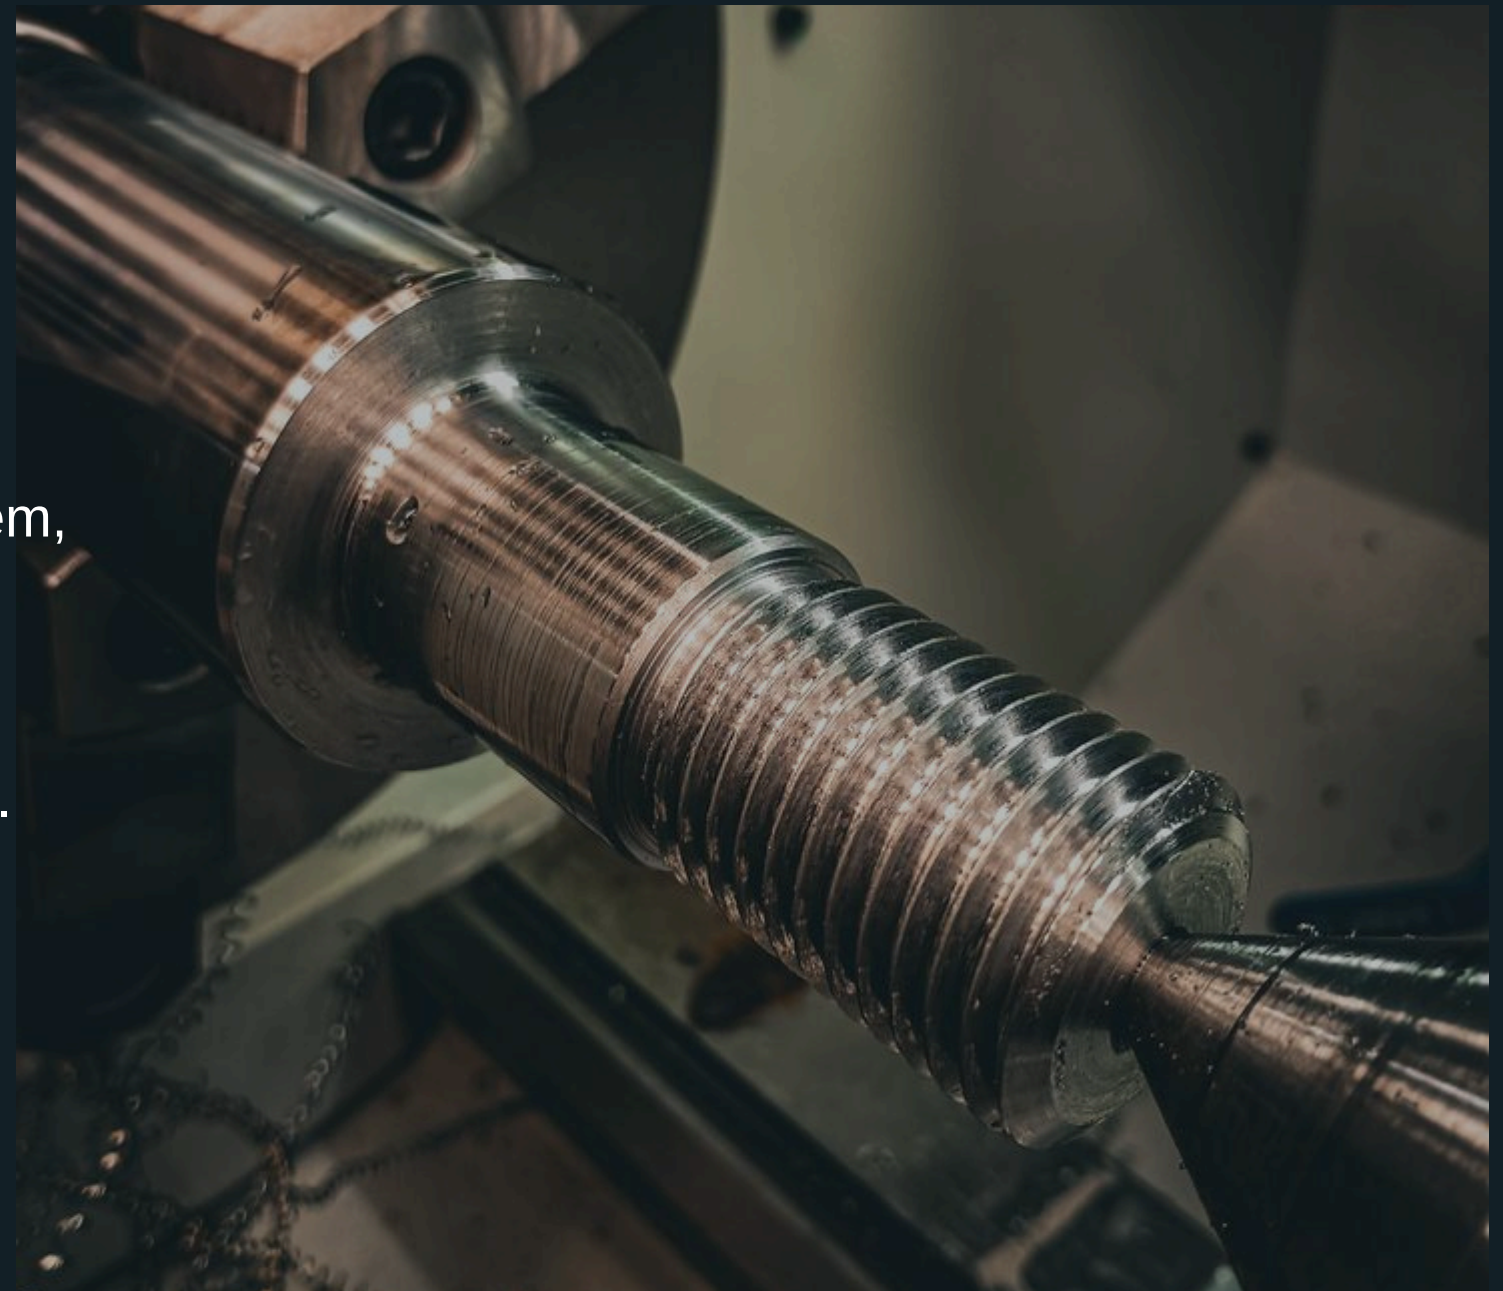

clear communication

reliability

Welcome to Bakony Masters

Bakony Masters is a CNC machining company based in Veszprém, Hungary, providing precision metal machining services for custom parts and small-batch production.

Our goal is to support our customers as a reliable, long-term partner through fast, precise and high-quality part manufacturing.

technological precision

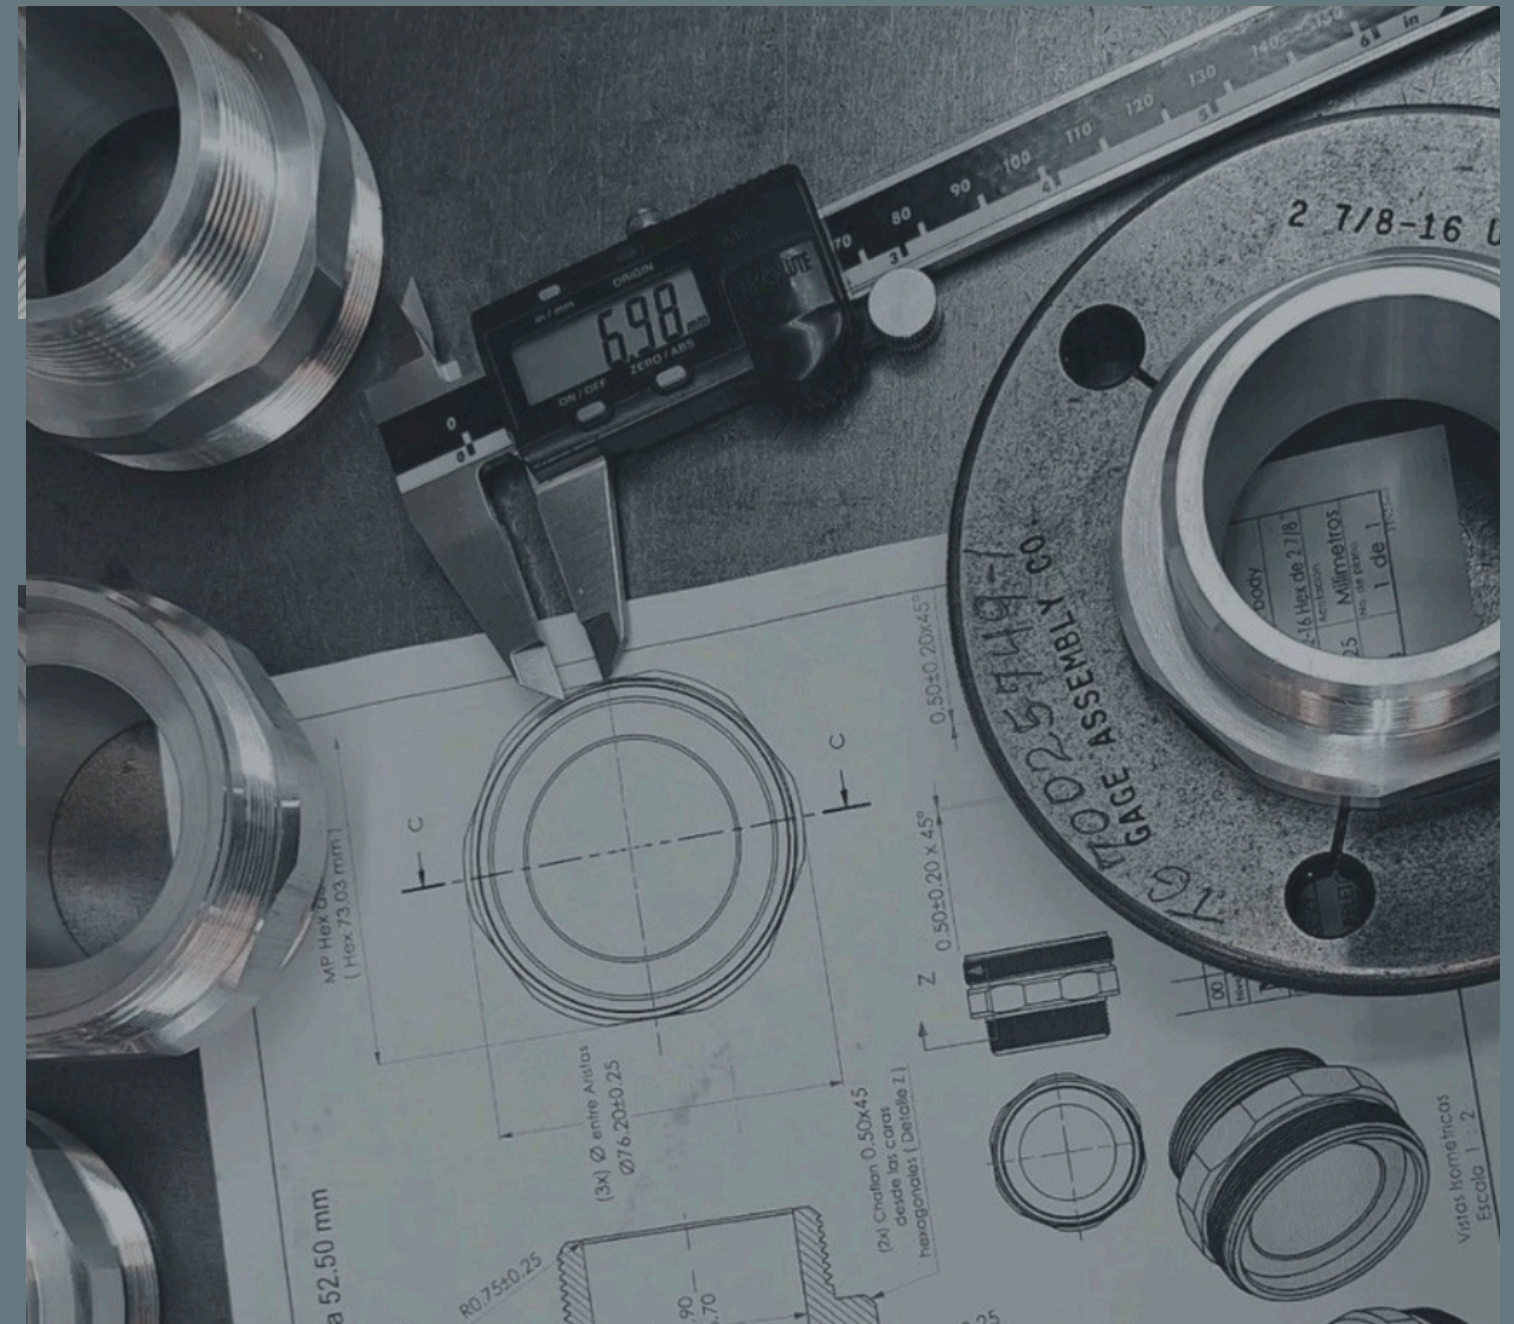

expertise

Professional background

Throughout our careers, we have gained direct experience with the strict quality assurance and documentation requirements of the automotive industry, as well as the zero-defect mindset expected in the aerospace industry. This background provides us with the precision and disciplined approach we apply throughout every manufacturing process.

Finished parts are produced under controlled conditions, with continuous measurement and inspection, with particular emphasis on accuracy, reliability and consistent quality.

For us, quality is not a final inspection, but part of the manufacturing process.

effective solutions

flexibility

Technology & Capacity

Maximum turning diameter: Ø 150 mm

Maximum machining length: 400 mm

Spindle through-bore: 40 mm

Our CNC lathe capacity is optimized for the production of small and medium-sized turned components requiring exceptional precision.

development

Our Manufacturing Process

- 01** Request for quotation
Send us the 3D CAD model (.STEP) or technical drawing (.PDF) together with the required quantity.
- 02** Preparation
After a process analysis, we create the CNC program and select the optimal tools.
- 03** Production & QC
Precision CNC turning, followed by measurement inspection and documentation of the finished parts.
- 04** Delivery
After careful packaging, the parts are delivered to your facility on time.
