

LIMOPLAST

CAPABILITIES & SERVICES

Manufacturing, construction, engineering, logistics and export.

ONE PARTNER. MULTIPLE CAPABILITIES.

From customer drawings to finished products and project delivery, Limoplast combines metalworking know-how, industrial manufacturing, construction and technical support.

01 METAL & INDUSTRIAL

Steel structures, machining, tanks, tools, trailers and custom metal products.

02 CONSTRUCTION

Buildings, roofing, joinery and integrated building-envelope works.

03 ENGINEERING & DELIVERY

Technical support, design, logistics, road freight and export.

MANUFACTURING ACCORDING TO CUSTOMER DRAWINGS

Bosnia and Herzegovina | Industrial production and project delivery for domestic and international customers

01 | METAL PROCESSING & METAL PRODUCTS

CORE METALWORKING CAPABILITIES

Production and fabrication activities for industrial and commercial customers.

Cold forming & bending of profiles

Cold forming, shaping and bending of metal profiles for components and structural applications.

TYPICAL APPLICATIONS

Profiles, frames, supports, custom formed sections.

Metal structures & parts

Manufacture of metal structures and their parts according to drawings and project requirements.

TYPICAL APPLICATIONS

Steel frames, substructures, platforms, supports, assemblies.

Tanks, reservoirs & metal vessels

Manufacture of tanks, reservoirs and other metal vessels for industrial applications.

TYPICAL APPLICATIONS

Storage vessels, fabricated tanks and customer-specific metal vessels.

Steam boilers (non-central heating)

Manufacture of steam boilers and related fabricated units, excluding central-heating boilers.

TYPICAL APPLICATIONS

Industrial boiler components and fabricated pressure-related assemblies.

Machining of metal

Machining and precision processing of metal parts and components.

TYPICAL APPLICATIONS

Drilling, milling, turning, finishing and customer-specific machining.

Tools

Manufacture of tools and related metal products for industrial use.

TYPICAL APPLICATIONS

Custom tools, fixtures, jigs and production aids.

Steel drums & similar vessels

Manufacture of steel drums and similar fabricated steel vessels.

TYPICAL APPLICATIONS

Industrial steel drums and fabricated metal packaging solutions.

Light-metal packaging

Manufacture of packaging and related products made from light metals.

TYPICAL APPLICATIONS

Aluminium and light-metal packaging components.

Other finished metal products

Manufacture of other finished metal products not elsewhere classified.

TYPICAL APPLICATIONS

Custom fabricated products, assemblies and special metal components.

02 | INDUSTRIAL EQUIPMENT & VEHICLE SOLUTIONS

INDUSTRIAL MANUFACTURING

Selected manufacturing activities covering equipment, machinery and transport-related products.

Other electrical equipment

Manufacture of other electrical equipment for industrial and technical applications.

TYPICAL APPLICATIONS

Customer-specific electrical equipment and assemblies.

Industrial furnaces, ovens & burners

Manufacture of industrial furnaces, ovens and burners for production and processing environments.

TYPICAL APPLICATIONS

Industrial heating equipment and fabricated furnace components.

Powered hand-held tools

Manufacture of powered hand-held tools and related equipment.

TYPICAL APPLICATIONS

Special-purpose powered tools and industrial handheld equipment.

Agricultural & forestry machinery

Manufacture of machinery for agriculture and forestry.

TYPICAL APPLICATIONS

Steel components, assemblies and complete machinery where applicable.

Vehicle bodies, trailers & semi-trailers

Manufacture of bodies for motor vehicles, trailers and semi-trailers.

TYPICAL APPLICATIONS

Trailer structures, side panels, steel bodies, frames and customer-specific assemblies.

CUSTOMER-SPECIFIC PRODUCTION

We manufacture according to customer drawings, technical documentation, material specifications and agreed quality requirements.

03 | CONSTRUCTION & BUILDING WORKS

BUILDING & CONSTRUCTION SERVICES

Construction activities supported by in-house metalworking, fabrication and technical know-how.

Construction of residential & non-residential buildings

Construction of residential and non-residential buildings, including industrial, commercial and other building projects.

TYPICAL APPLICATIONS

Industrial halls, commercial facilities, warehouses, offices and residential buildings.

Installation of joinery

Installation of doors, windows and other joinery as part of building-envelope and finishing works.

TYPICAL APPLICATIONS

Doors, windows, metal and glazed joinery systems.

Roof structures & roof covering

Erection of roof structures and execution of roof covering works.

TYPICAL APPLICATIONS

Steel roof structures, roofing systems, sheet-metal finishing and associated details.

INTEGRATED DELIVERY

From steel fabrication to building-envelope completion

Depending on project scope, Limoplast can combine steel structures, roof systems, joinery, sheet-metal elements and other fabricated components into coordinated building solutions.

04 | LOGISTICS, ENGINEERING & TECHNICAL SUPPORT

SUPPORTING BUSINESS SERVICES

Engineering, design and logistics activities supporting complete customer solutions.

Services incidental to land transport

Supporting activities related to road and land transport operations.

TYPICAL APPLICATIONS

Transport coordination and operational support.

Cargo handling

Cargo handling and loading/unloading activities.

TYPICAL APPLICATIONS

Industrial cargo handling, loading and unloading support.

Architectural activities

Architectural services related to building and project development.

TYPICAL APPLICATIONS

Architectural planning and project coordination.

Engineering & technical consulting

Engineering activities and related technical consultancy.

TYPICAL APPLICATIONS

Technical planning, engineering support and project advice.

Specialised design activities

Specialised design services for industrial, product and project applications.

TYPICAL APPLICATIONS

Technical design, industrial detailing and customer-specific design support.

ONE PARTNER - MULTIPLE CAPABILITIES

Manufacturing, construction, engineering and logistics can be combined according to the requirements of each project.

05 | CAPABILITY OVERVIEW

WHAT LIMOPLAST CAN DELIVER

A concise overview for buyers, procurement teams and industrial partners.

METAL FABRICATION

- Profile forming and bending
- Steel structures and assemblies
- Machining and custom metal parts
- Tanks, reservoirs and vessels
- Tools and finished metal products

INDUSTRIAL MANUFACTURING

- Electrical and industrial equipment
- Furnaces, ovens and burners
- Agricultural and forestry machinery
- Vehicle bodies, trailers and semi-trailers

CONSTRUCTION

- Residential and non-residential buildings
- Joinery installation
- Roof structures and roof covering
- Integrated steel and building-envelope works

ENGINEERING & LOGISTICS

- Architectural services
- Engineering and technical consulting
- Specialised design
- Land-transport support
- Cargo handling

MANUFACTURING ACCORDING TO CUSTOMER DRAWINGS

Send us your drawing, material specification, quantity and delivery requirements. Our team will review the scope and prepare a production solution.

06 | TRANSPORT, DELIVERY & INTERNATIONAL TRADE

FROM PRODUCTION TO DELIVERY

Manufacturing can be combined with transport and cross-border commercial delivery.

ROAD FREIGHT TRANSPORT

Limoplast Gradačac is classified for road freight transport. Transport can therefore be offered as an additional service for products manufactured by Limoplast, subject to route, capacity and agreed commercial terms.

MANUFACTURE + TRANSPORT

Customers can request transport together with manufacturing. Steel structures, fabricated components, trailers, tanks and other manufactured products can be supplied with an arranged road-delivery option.

FOREIGN TRADE & EXPORT

LIMOPLAST d.o.o. Šamac is registered for foreign trade within the scope of its registered activities, supporting direct export of manufactured goods and project deliveries to customers outside Bosnia and Herzegovina.

ONE SUPPLIER - PRODUCTION, DELIVERY AND EXPORT

Where required, Limoplast can combine production with arranged road freight transport and international delivery as part of one commercial offer.
