	• Domenico Iuliano		5%

Our History

National and International Growth

1981

The born and the national grow up of Acroplastica in Italy

2009

**The crisis...
A big opportunity that push our target across Italian borders. We start to work a lot with foreign customers**

2014

In that year we started the adventure with new plants in other countries. It was our first step to start a way towards the international course. We trust in our strong organization, moved from knowledge and deep motivation we start a production in Romania and in Turkey.

Company introduction

Acroplastica a strategic partner strong and dinamic

**Design, process industrialization, production and
assembly of thermoplastic component.**

Injection process is the heart of our business

We have factories in 3 different country:

- 1.In Italy, a Caserta***
- 2.In Romania, in Arad**
- 3.In Turkey, in Manisa**

Company introduction

**Acroplastica a modern partner
strong and dinamic**

**Design, process industrialization,
production and assembly of thermoplastic
component.**

We are specialized in injection technology and not only...

Where are:

- **Injection machine from 40 ton to 1400 tons.**
- **Tampography area where we are able to work with 10 different colours in only one step.**
- **Digital print**
- **Hot foil automatic machine**
- **Welding machine, (ultrasonic, vibration)**

Italy Plant

Turkey Plant

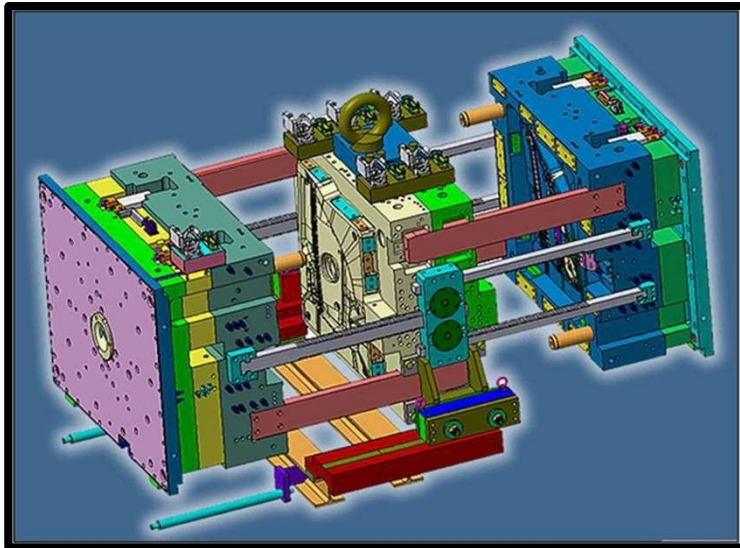

Design and Mechanical workwhop (maintenance)

Full integration from Design to Production

Our organitation are able to give right support to design new mold for injection process. We have a Workshop to service a injection department that can improve moulds efficiently , making an ordinary and extraordinary maintenance.

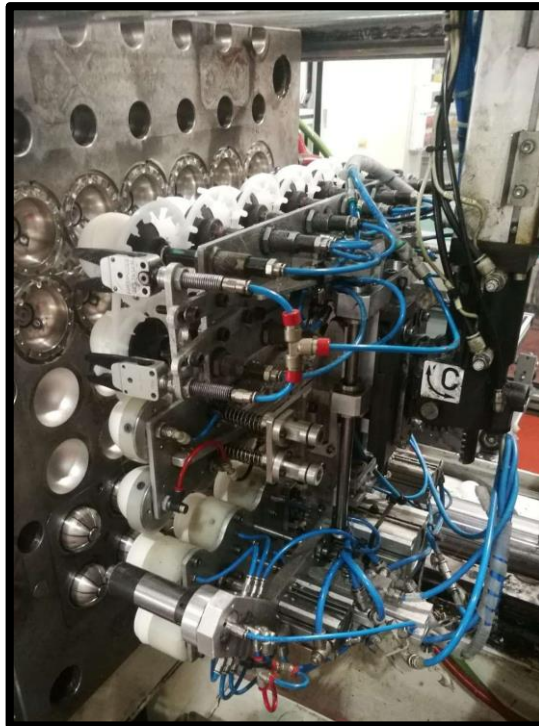

We are able to design new process with innovative approach

Injection process is the heart of our business

Below one of our Patent, Ecoball bi- injected against blow mold solution.

Integration with customer

MRP

We are completely integrated with informatic system of our customers in order to receive automatically the orders, thanks to our MRP we can manage everything with the philosophy of Lean Production, and Just in Time, in order to reduce timing and stock level. The application of this principles allows us to have best price for plastic transformation, with high quality standard.

Due to our results in quality field, we are “free pass suppliers”.
