

Our strength is speed

We deliver plastic and metal parts
on short notice.

Injection mold manufacturing
Plastics processing (Injection molding)
CNC milling
Product design (CAD)

Ladies and Gentlemen,

Welcome to a world where a passion for precision meets modern technologies.

At 3DForce, we have been supporting our clients in implementing their most demanding projects for years. We offer comprehensive solutions – from CNC milling, through the production of plastic and metal parts, to specialized design.

Our mission is to provide services that combine speed, reliability, and the highest quality.

Thanks to our experience and advanced machinery, we are ready to meet any challenge, regardless of scale or complexity.

3DForce sp. z o.o.

3DForce Specialization

Injection Molds

Our goal is to fulfill orders quickly while maintaining the highest quality.

Product design

Fast

The first plastic elements are manufactured and delivered in just 14 days.

You'll discover that mold making
can be simple and enjoyable.

We ensure that the mold ordering and production process is simple and transparent. That's why we offer our clients modern solutions and the support of experienced specialists.

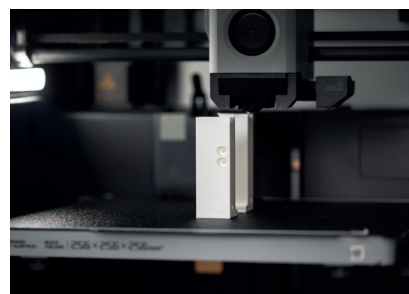

We will verify the project

We conduct DFM analysis to identify and highlight opportunities for optimization and improvement. With our knowledge and experience, we can help you achieve better results and maximize your project's potential.

We will help you choose materials

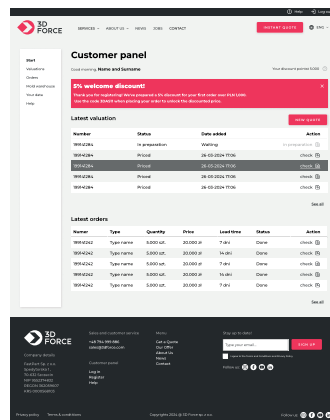

We offer a wide range of plastics. We're happy to advise you on finding the best solution for your needs.

We will prepare a prototype

We offer the possibility of quick and precise 3D printing of a prototype, which allows for additional verification of design assumptions.

Injection mold calculator

We offer an injection mold calculator that allows you to quickly determine the mold price, taking into account the configuration of the cavities, lead time and other parameters

Modern ordering system

Our customers value simplicity and convenience – that's why we've created an ordering system

that allows you to intuitively manage the entire production process.

Quick production quote

50 **100.000**

Name
100.000 pcs

Detail

Injection mold
One-time mold injection cost

Discount: 5%
Discount value: 244,55 PLN
Discounted mold cost: 4.819,00 PLN

Production of moldings
Order anytime.

Production of moldings: 22.973,32 PLN
Discount: -0,92%
Price per piece: 2,49 PLN

Completion date

Estimated production time of moldings: 9 days

Further information

Validity of the offer: 14 dni

ORDER

Set the parameters of your order yourself – easily specify the number of items and generate a price online using our modern service system.

Product analysis already at the pricing stage

Required design changes (2)

- 1 Item change needed [check](#)
- 2 Size adjustment is needed [check](#)

Suggested design changes (2)

- 1 Correction of the mounting of the vertical elements of the fixture will reduce the production costs of the element [sprawdź](#)
- 2 Correction of the mounting of the vertical elements of the fixture will reduce the production costs of the element [sprawdź](#)

Obtain a preliminary technological analysis of your models at the pricing stage. Detect and correct potential design errors in your component.

Get to know our services

We are constantly developing to ensure the highest quality with the shortest possible lead times.

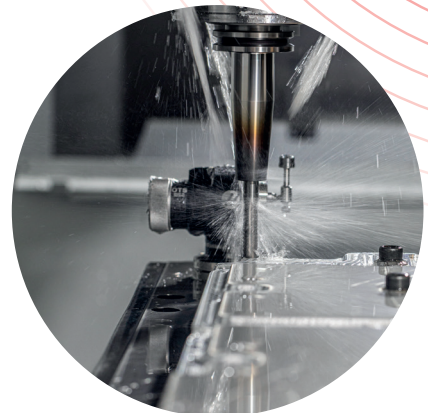

Production of plastic parts

- Injection molded products **from 50 pieces**,
- Ready-made items available in as little **as 14 business days**,
- A wide range of materials and finishes, tailored to individual customer needs,
- High quality standards in accordance with **ISO:9001**.

CNC milling

- **3- and 4-axis** machining available,
- Precision machining of **steel**, **aluminum**, and **plastics**,
- Short and large production runs,
- Professional advice on the selection of materials.

Get to know 3DForce

The result of our work is not only quality products,
but also good and lasting relationships

Why is it worth trusting us?

- **Modern machinery** guaranteeing precision and efficiency,
- **New quality on the market** – we offer solutions that make ordering parts simple and enjoyable,
- Our **knowledge, experience** and **established practices** provide real support to our clients.

We are a European company with strong values

- We focus on quality both in production processes and in relationships with our partners,
- We care about **security** and **lasting relationships**, building trust with, our clients at every stage of cooperation,
- We are constantly developing, combining modernity with high competitiveness.
