WELDED FABRICATION TO CUSTOMER DRAWINGS

HSP2 manufactures welded parts and assemblies to customer documentation. Production takes place in Środa Wielkopolska; the company's registered office is in Gliwice.

HSP2 AT A GLANCE

MAG 135
WELDING PROCESS

TIG 141
WELDING PROCESS

- Prototypes
- Repeat production
- Short runs
- Customer-supplied material or complete supply

TYPICAL SCOPE

Brackets, holders, frames, machine bases, auxiliary structures and welded assemblies.

This is not a closed product catalogue. We assess every enquiry on the basis of its documentation.

QUALITY REQUIREMENTS

Requirements for welds, inspection, measurements, material certificates and acceptance documentation are agreed before quotation.

How HSP2 fits into your supply chain

We confirm the scope of work, acceptance requirements, schedule and commercial terms after reviewing the documentation.

MODEL 01

Additional welding capacity

The customer supplies material or prepared parts; HSP2 carries out the agreed scope of welding and inspection.

MODEL 02

Coordinated supply

HSP2 organises the agreed material scope and additional operations through partners.

Laser cutting, bending, machining, galvanising and powder coating, subject to confirmation of partner capabilities.

TYPICAL CUSTOMERS

- Machine and equipment manufacturers
- Industrial integrators
- Automation and intralogistics
- Manufacturers of structures and equipment
- Companies with in-house cutting and bending that need additional welding capacity

Examples of typical customers. Enquiries from other sectors are assessed on the same basis.

How we handle an order

Every stage refers to a single, approved revision of the documentation.

01	**RFQ**	Documentation, quantity, material, required date.
02	**Review**	Revision, geometry, welds, tolerances, acceptance requirements.
03	**Costing and quotation**	Scope, lead times, responsibilities, exclusions, price.
04	**Production**	Work to the approved documentation.
05	**Inspection and delivery**	Scope of inspection and documentation as agreed.

DRAWING REVISION CONTROL

Before quoting, we check the drawing number and revision and report any ambiguities or inconsistencies to the customer. Production follows the approved revision. Deviations from the documentation are made only with the customer's written approval.
