# Craftsmanship in metal

Geton is flexible, thinks along and supplies high-quality products in a very short delivery time.

**Geton employs people with a passion for sheet-metal work and constructions, specialised in stainless steel and with an eye for detail.**

Based on craftsmanship and expertise, combined with smart machinery and equipment, Geton can deliver in accordance with the client's requirements in an efficient and swift manner.

Geton delivers high-quality products with an excellent finishing at all times. This includes large manufacturing frames as well as precision parts in an assembly.

Geton mobilises its craftsmanship and quality on markets related to high-tech mechanical engineering, medical and pharmaceutical applications, the food industry, and esthetical works.

As such Geton also operates on the international market and is constantly searching for expansion and innovation in technology, to relief clients.

Organisations such as ASML, Philips Medical Systems and IMA Healthcare frequently made use of the Geton Roestvrijstaalindustrie craftsmanship and speed.
