G.W.P. AG - what we do

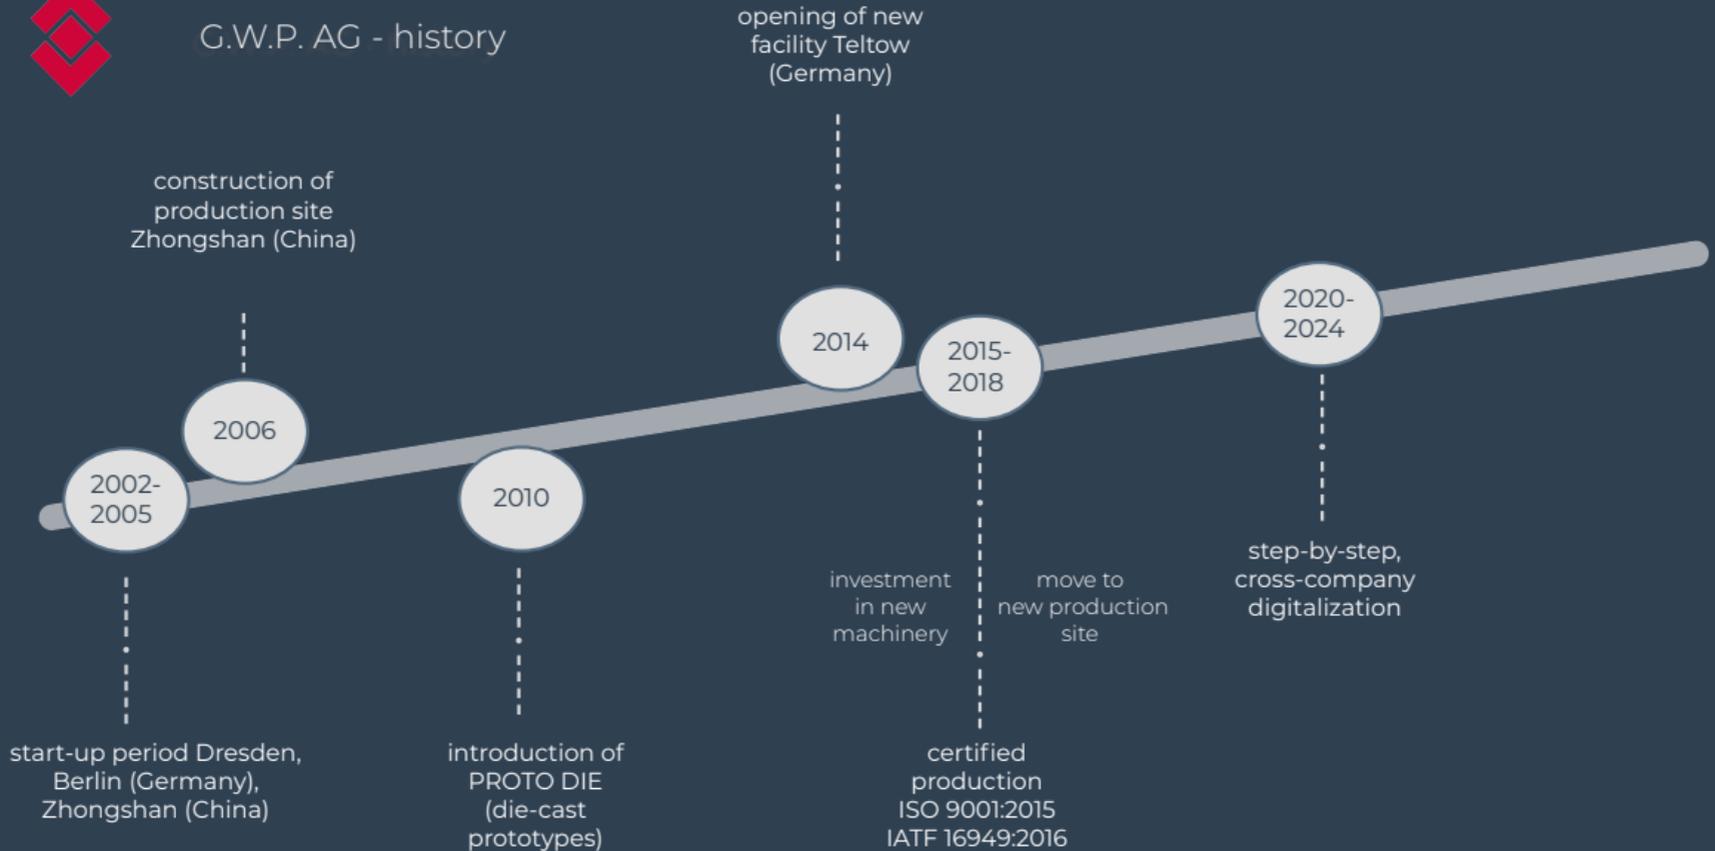

» your partner along the value chain »

G.W.P. AG - history

G.W.P. AG - production sites & partners

- Germany
- China/Hongkong
- Greece
- Netherlands
- Poland
- Lithuania
- Turkey
- Bulgaria

G.W.P. Manufacturing Services AG
Teltow (Germany)

sales / headquarters

G.W.P. Manufacturing Services Ltd.
Zhongshan (China)

production / logistics

G.W.P. Manufacturing Services Ltd.
Hongkong

legal representative

G.W.P. AG - sales & company data

share capital: 125.000 €

sales development

2020	4,7 Mio €
2021	5,6 Mio €
2022	6,1 Mio €
2023	6,7 Mio €

board (Vorstand)

Jörg Faust & Rocco Weyers

shareholder structure

6 shareholders, the board holds majority

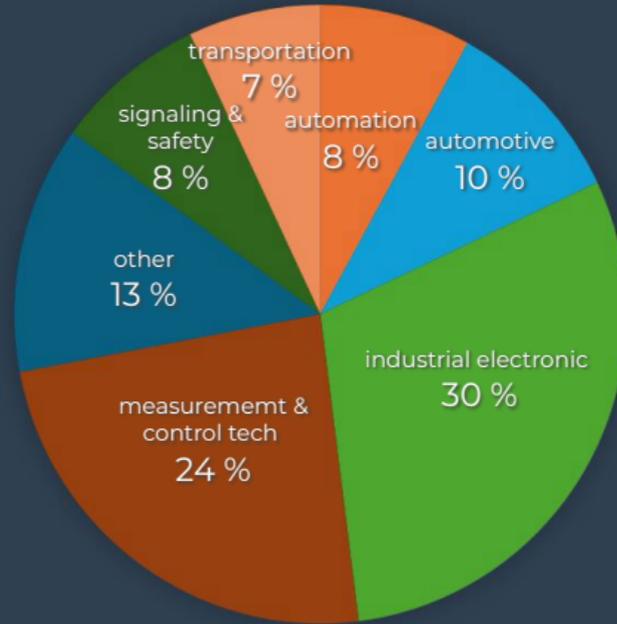

supervisory board (Aufsichtsrat)

Thomas Knappworst (chairman)
Dr. Christopher Özbek
Dr. Kai Wundram

employees

10 in Germany, 45 in China

industries

we work with experienced industrial designers who are familiar with highly dynamic capital goods markets.

when involved at an early stage of your product development, our engineers will provide cost-effective support.

our team offers guidance on selecting the best materials and processes for cost-effective and efficient die casting and injection molding.

we create 3D models in all standard CAD formats or adapt them when changing production processes.

ENGINEERING SERVICE

industrial design
expertise from the start

construction & development
acceleration of innovation cycles &
total cost reduction

technology consulting
cross-industry & cross-process

cad evaluation
economic production on a solid
basis with all parameters

considering the function of the final product and its manufacturing processes,
we support you in selecting the optimum prototyping process.

aluminum, zinc & plastic < **material**

1-100 pcs (prototypes) < **quantity**

101-3.000 pcs (pre-production)

post-tool production: 20 calendar days < **delivery time**

manufactured to standard production tolerances < **tolerances**

CNC machining, grinding < **processing**

varnishing, powder coating, anodizing & < **surface treatment**

galvanic treatments, metallization & MC coating

PROTOTYPING

PROTO DIE
PROTO INJECT

vacuum casting
cnc-milling
precision casting
SLS & SLA
deep drawing

further 3D printing

tool construction

high-quality industry tools optimized for the target output quantity

surface treatment

vibration polishing, powder coating, painting, EMC- & KTL-coating, passivation

sealing concepts

directly applied or assembled to meet IP-protection requirements

SERIAL MANUFACTURING

metal processing

die casting, gravity die casting, extrusion, cnc milling & lathing, deep drawing

plastic processing

in a wide variety of plastic materials

FOCUS:

tool-intensive processes for small & medium-sized series

consulting

at all points of the value chain

coordination

of the entire production project

assembly service (pre- & final)

logistic service worldwide

IP tests, PPAP sampling

ADDITIONAL SERVICES

production sites
in Germany, Europe, Asia

quality

- IATF 16949:2016
- ISO 9001:2015
- quality-sensitive procedures are provided in Germany and Europe
- the toolmaking in our in-house production is of high quality. The tools are optimized for the respective life cycle of the components.

cost efficiency

- you get one supplier - from design to production
- flexible use of manufacturing processes
- short delivery times for prototypes & series tools
- 20+ years of project experience across multiple processes and industries
- reduce manufacturing costs by shortening the product development phase

legal & planning certainty

- German contractor
- contract design and corporate transparency according to German and European standards
- partner with high credit rating
