Introduction of our company

Our company is located in Prevalje, a smaller town near Austrian border (8 km).

We are a production company with 8 employed workers and more than twenty-year tradition in the field of mechanical processing of metals, machining, making constructions and products for foundry industry.

Our production program consists of:

- machining (milling CNC 3D, turning, drilling NC, engraving)

- production of metal models for foundry industry
- making frameworks out of KER-ROCK for digital Juke-boxes

Our main advantages in relation to our competition are:

1. quality products which meet DIN standards
2. lower production costs
3. complain of delivery deadlines- JUST IN TIME
4. machining of smaller parts in 24 hours
5. own transport up to 1.5 T

Introduction of our company

- production and repairs of foundry frames

- welding MIG/MAG and soldering

- production of constructions and devices

Introduction of our company

- CNC turning

- production of base frames for transformers (wheels)

Our machines :

- 3D CNC milling machine 6-axis BOKÖ (1500mm x 1000 mm x 1000 mm; rotary table 360° ; milling head +90°/-90° ,w axis 300mm)
- CNC Universal milling machine CORREA (2000mm x 800mm x 800 mm)
- CNC Horizontal milling machine SCHELLER (950mm x 450mm x 450mm)
- NC Table type milling machine TOS (1250mm x 1250mm x 1125mm, w-Axis, rotary table 360°)
- NC milling machine WANDERER (800mm x 400mm x 400mm)
- CNC turning machine CHURCHILL (Ø650mm x 1000mm)
