

SERVICES

2007

Baltic Metalworking group is strong, growing company, which dedicated to providing metalworking services and metal constructions.

WWW.BMGROUP.LV

Mr. Igor Sinenko
Chairman of the board / Director

“From the beginning, we at BMG have worked hard to build a reputation as a metalworking source that is dependable in both product and customer service!”

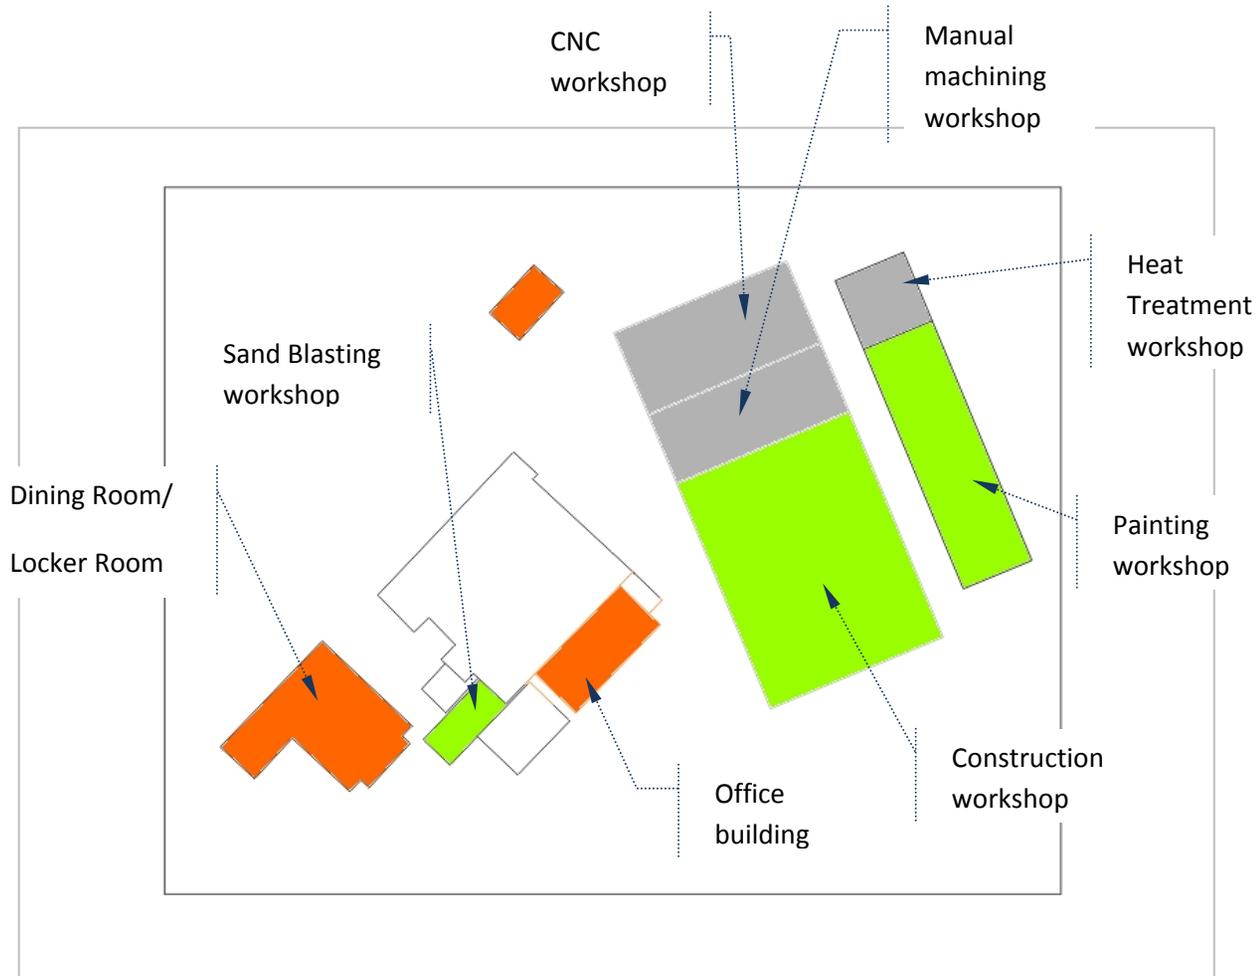

Mr. Oleg Horoneko
Member of the board / Financial director

“Our company is dedicated to keep our customers satisfied!”

Contents

CNC machining	3
Manual machining	5
Metalware welding	6
Contacts	7

« Our company makes mechanical work, on new machine tools of firm „Mazak” and also manufacturing welded metalware in weight up to 20 tons for various areas (electric-power industry, mechanical engineering, agriculture, food-processing industry).

« 1600 m² of main manufacturing.

« 3 floor workshop.

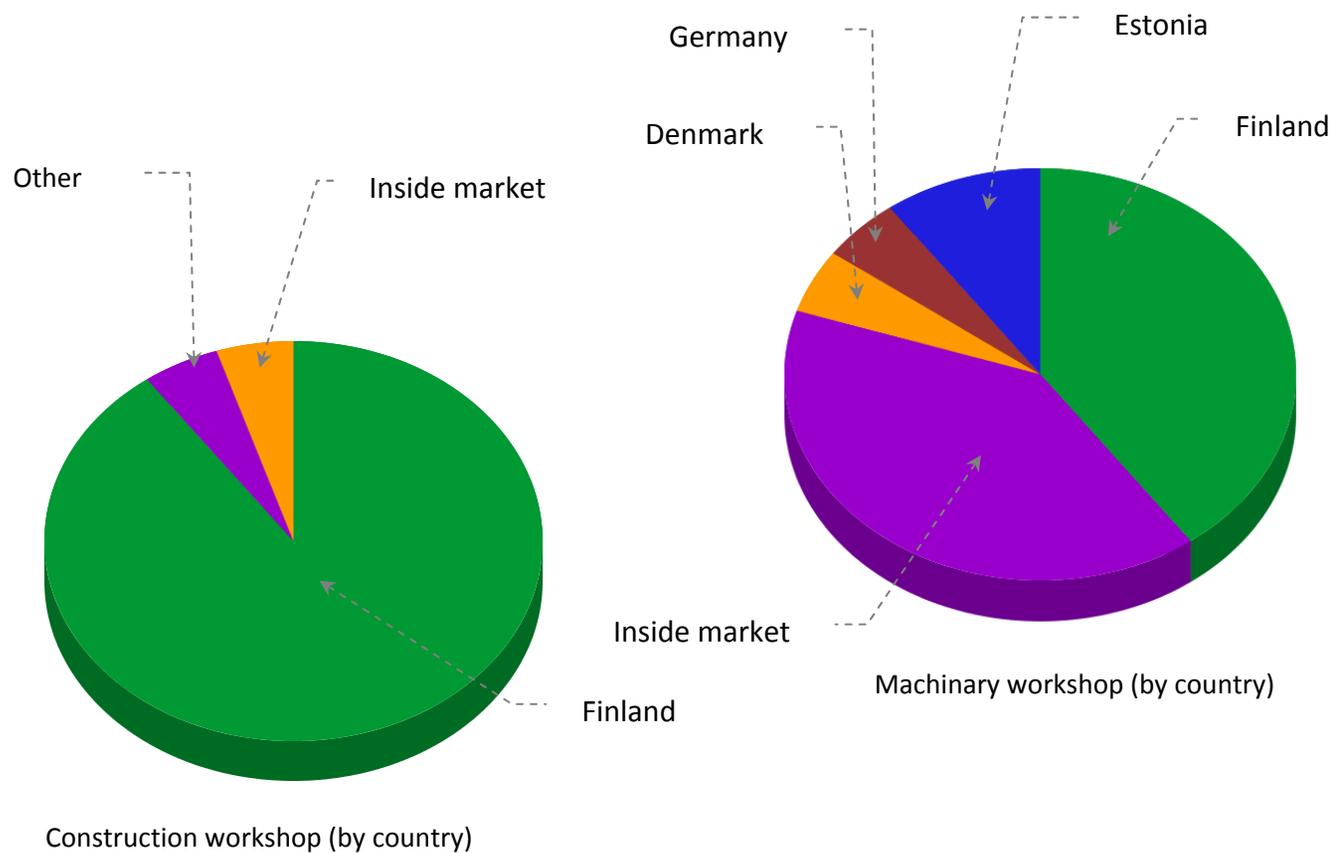

« Heat treatment workshop

« Painting workshop

Costumers

At BMG, we keep a clear focus on our customer's needs, manufacturing parts efficiently, on time, to exact specifications. We take pride in our history of reliability and business integrity, having built relationships with many long-term customers who appreciate our commitment to exceptional service and delivery.

Main long-term customers:

Koja Group | Diversified and progressive Koja Group offers the customers top-quality products and services in the field of air handling and building technology contracting.

Raumaster Oy | Finnish engineering in the wood processing and energy industries is of world class quality. Raumaster Oy, founded in 1984, is a renowned supplier of advanced material handling systems and equipment. Today our company is regarded as a global leader in its line of business.

CFS | The food industry is characterised by increasingly demanding consumers. In highly developed markets consumers want "easy meal solutions", smaller portions, convenient packaging, fresh distribution and safe products.

SAMESOR | Since 1969 Samesor has been designing and manufacturing innovative production lines for the sheet metal working industry worldwide.

CNC workshop

We aim to provide you with a product and service that is of an excellent standard, at a very affordable price. We are able to achieve this by utilizing our in-house expertise in automation, software, electrical & mechanical engineering combined with graphic design to create a highly integrated system of manufacture that allows for lower overheads and smaller costs.

Mr. Vladimir Bogov
CNC workshop head

“BMG has maintained a high standard of quality!”

MAZAK QUICK TURN NEXUS II 250 M 500

Max turning diameter: $\varnothing 380$ ($\varnothing 14.75$ ") mm
Max. machining length: 504/(19.858") mm

MAZAK QUICK TURN NEXUS II 250 M 1000

Max turning diameter: $\varnothing 380$ ($\varnothing 14.75$ ") mm
Max. machining length: 1085/(39.858") mm

MAZAK VERTICAL CENTER NEXUS II 510 C

Table size: 1300x550(51.18x21.65") mm

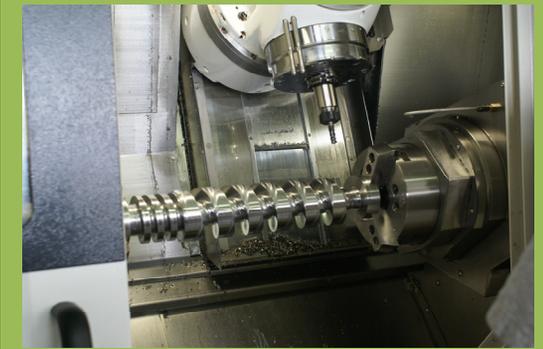

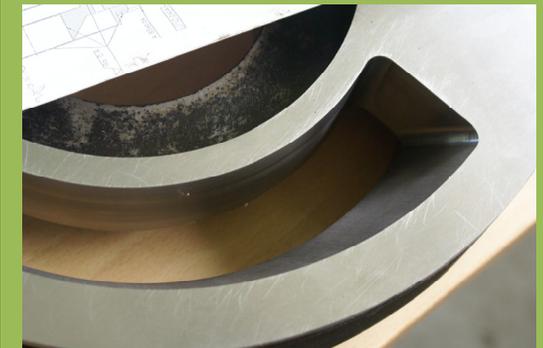

MAZAK INTEGREGX 200-IV S

Machining as You Like The INTEGREGX has become the most widely sold multi-tasking machine tool in the world.

LNS QUICK LOAD SERVO 80

THE IDEAL AUTOMATIC BAR FEED PROVIDING SUPERIOR PRODUCTIVITY FOR BAR STOCK DIAMETERS 1/4" - 3-1/8" Overall bar stock length: 14" - 63" (350 mm - 1600 mm) Used with fixed headstock lathes

Manual machining workshop

For batches, main, secondary operations and finishing, from one off, we maintain a manual machining section for the manufacture of precision parts in all plastics and metals.

Mr. Viktor Zajac
Manual machining workshop head

“...This gives us the ability to match the right level of machining to the product's requirement”

- « Machining diameter till 1000 mm
- « Machining length till 5000 mm
- « Heat treatment workshop
- « Metal cutting workshop

Construction workshop

Standart metalware welding.

Metalware welding from customers drawings.

Metalware welding from customers drawings wich are developed with a help of our designers.

Our company manufacturing welded metalware in weight up to 20 tons for various areas (electric-power industry, mechanical engineering, agriculture, food-processing industry).

Mr. Roger Mikelson
Main Designer

“We are prepared to supply your requirements. BMG provide a wide range of advanced general welding services and custom manufacturing solutions.”

- « Press brake with CNC
- « Hydraulic 4 rolls plate bending Machine with CNC
- « Painting workshop
- « Sand blasting workshop
