

Steel-bronze pins planetary gears

ADVANTAGES:

Resistance to highest loads and stress.

Excellent sliding properties , even by temporary lack of lubrication.

Good ability to reduce vibrations and resonances.

Permits a minimum of bearing clearance with highest precision.

Resists to high temperature

Materials :

bronze SAE794

bronze CuPb20Sn DIN/ISO 4383

other grade on request

Additional layers :

on request with additional sliding layer (Trimetal or multilayer - also polymeric coatings)
