## about us

Our company is established by our father and mentor Mr. Kenan Yildiz in the year 1984. Today, the company's management is in its second generation and overseen by brothers Mr. Fatih and Eyup Yildiz.

Due to increasing job opportunities, we move to our new facility in Istanbul, Bayrampasa Industrial Zone in year 2002. Our manufacturing facility is 750 m<sup>2</sup>. We are continuing to make new investments to better serve our customers and respond to their needs more effectively.

Yildiz Machine is manufacturer of machining metal parts by cnc machines mainly for automotive industry, energy industry, aviation industry, fastening equipments industry, defense industry and their tier one suppliers. Automotive industry is one of the leading sectors in Turkey.

We are helping to our customers for their new projects by designing in 3d and prototype and serial manufacturing. In last four years we have been exporting our products to European customers.

From the first step till last step of manufacturing we closely follow ISO 9001:2000 standards through our qualified workers and professional cnc machines and special tools. We have the same sensitivity for all materials that we are outsourcing such as raw materials, cutting tools etc.

Our first rule is maximum customer satisfaction. We pride ourselves on supplying the best products in the shortest time with highest quality and lowest possible price. We also provide all kind of warranty to our products.

Our main difference then our competitors is our honesty and commitment to quality service to our customers and we would like to thank our customers who refer us.

## quality policy

- Able to be respond our local and international customers all needs by maximum customer satisfaction rule and we pride ourselves on supplying the best products in the shortest time with highest quality and lowest possible price.
  - To reach the maximum level on international standards.
  - Improve the steps of product manufacturing process and performance.
  - To reach our target point by participation of our all suppliers and employees .
- We add the above rules as our quality policy of our company which manufacturing steel parts. Some of our references;

## quality control

For prohibit all irregular products , we provide %100 frequency quality control. in our qc process we are using high-tech metrology equipments.

- Profile Projector Mitutoyo PJ-A3000, QMdata
- Brown & Sharpe 800x600x400 CMM

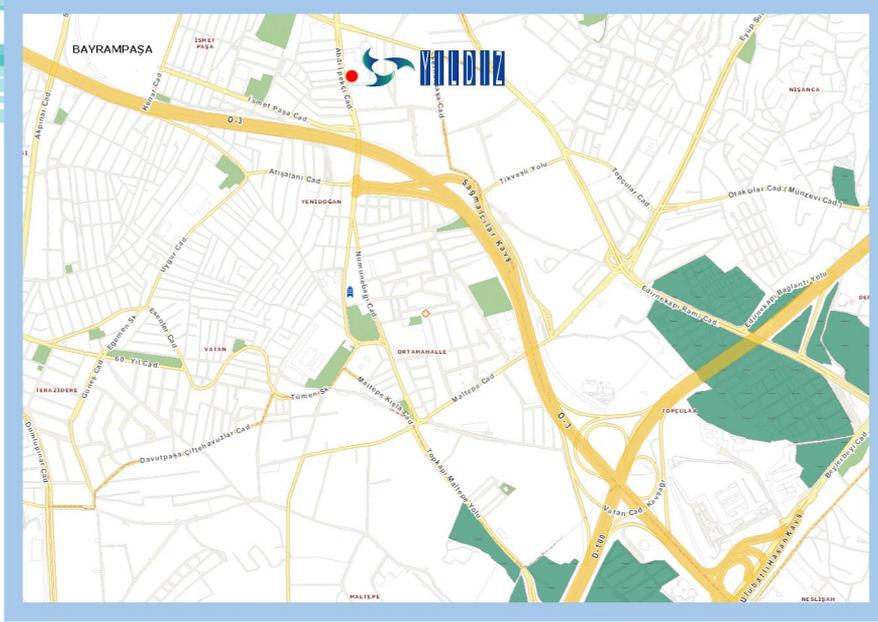

## machine line

- Takisawa TC-20 Cnc Lathe
- Takisawa TC-20r Cnc Lathe
- Okuma LB 15 – II Cnc Lathe C axis
- Okuma LB 300 Cnc Lathe
- Hyundai / Kia SKT 28 LM Cnc Lathe C axis
- Avea BM 1020 Vertical Machining Center with 4th axis
- Takisawa MAC-V40 Vertical Machining Center
- Okuma & Howa Cnc Vertical Machining Center with 4th axis
- Enshu Cnc Vertical Machining Center with 4th axis
- Cad/Cam: 3 unit Cimatron E7
