

- The company was established in 1995 – since then we have been successfully fulfilling tasks entrusted to us by our Customers. Our offer includes a wide range of services related to performing overhauls, manufacturing spare parts and rendering services for the companies, including the food industry.
- Based on our broad experience as well as the Customer's expectations – we render complex services: starting from the technical analysis of the assignment, through complete material supply, to the manufacturing phase of the subassemblies employing own engineering and manufacturing back-up facilities, as well as the on-site assembly, in the place indicated by the Customer. Such a complex activity is practicable thanks to the experience-based, flexible organizational structure, best fitting into the realized assignments. We have our own engineering department with highly qualified personnel. We have our own technical back-up facilities, based on specialized machinery and equipment. Our experienced personnel with confirmed skills and qualifications as well as the network of the sub suppliers and subcontractors – all this allows us to cope with any task entrusted to us, always within the agreed time and on the highest technical level.
- The shortest possible time of realization of the contract as well as the highest quality - at the reasonable price – those are our priorities we care most.
- We are aware of the Customers' expectations, we respect their time and money, therefore, we treat each and every of Them very seriously and with the highest esteem. The acknowledgement of that fact and the appreciation of our methods is the unceasing development of our company. We systematically modernize our production assets, invest in latest technologies, new manufacturing techniques and technologies and highly-qualified personnel. Our human resources policy is to support young, ambitious and creative employees who, along with the experienced engineering personnel, form a mix of, in positive meaning, professional routine and creative restlessness.

Our activity is not routine and it is extraordinarily efficient – the acknowledgement of which is a long reference list of the Companies we had and still have the pleasure to cooperate with.

- Our company has been granted the authorizations and certificates by the Technical Supervision Office (Urząd Dozoru Technicznego) within the scope of: Quality Assurance System ISO 9001:2001 as well as the techniques of manufacturing, modernization and repairs of tanks and pipelines. For comfortable cooperation and security of our Customers – we have the renewable insurance policy.

We sincerely invite you to the cooperation – in return, we offer reliable services, we have been developing for many years and we still will improve.

Faithfully yours,

Jerzy Muszyński
PRESIDENT OF BOARD

our offer of services

■ MANUFACTURING OF THE TECHNOLOGICAL SYSTEM

stainless steels, acid resistant steels, carbon steels, polyethylene

- central heating, steam and condensate systems
- transferring systems of the comestibles: beer, milk, sugar solutions, juice, malt, etc.
- technical water, ice water, treated water systems
- technological media systems: technical air, glycol, acids, gases, CIP

■ MACHINERY AND EQUIPMENT OVERHAULS AS WELL AS RENNOVATION

- bottling lines: monoblock, labeling machine, inspector, washing stand, palletizer, conveyors
- conveyors: roll, band, blade, vibrating and screw conveyors
- brewing equipment of feeder and discharge of malt and sugar

■ BUILDING AND TRANSFER OF THE FACILITIES, PLANTS, LINES, MACHINERIES AND EQUIPMENT

- complex erections of the facilities: boiler houses, central heating centres, CO₂ recovery stations, production lines
- performing of the reproduction disassembly works of technological lines and equipment
- disassembly works of the complete technical facilities, machinery and equipment
- transfer and the re-assembly works of the production lines

our offer of services

■ STEEL STRUCTURE MANUFACTURING

- trestle bridges for the pipelines – galvanized or covered with paint system
- supporting structures, supporting frames for machineries, tanks and equipment
- pressure tanks, non-pressure tanks, stainless steel and carbon steel silos

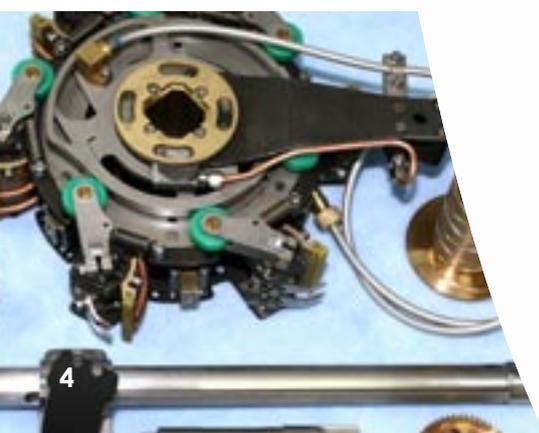

■ MANUFACTURING OF SPECIALIZED MACHINERY AND EQUIPMENT

performance according to the Customer's individual needs

- presses for changing the structure of the polyurethane foam
- equipment for foam cutting and crushing
- vertical coffee conveyors
- conveyors of monoblocks' covers
- turn-tables, manipulators and setting machines, according to the individual Customer's needs

■ MANUFACTURING OF THE SPARE PARTS FOR LABELLING MACHINES

- formatting subassemblies: tables, stars, worms
- labeling subassemblies: grab cylinders, label storages
- aluminum glue pallets, rubber glue pallets
- bottle stands, clamping elements, driving gear wheels
- labeling sponges, rolls, rubber elements for label bands

our offer of services

■ MANUFACTURING OF THE SPARE PARTS FOR OTHER BOTTLING EQUIPMENT

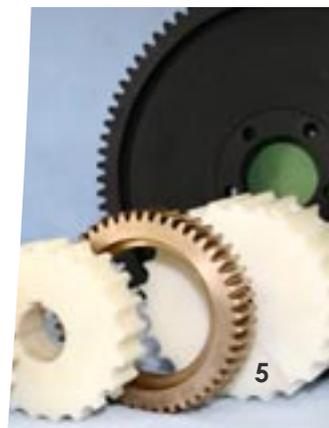

Monoblock, Inspector, Discharger, Palletizer, Bottle washer, Bottle and can conveyors

- formatting elements for guiding the packages
- steel and rubber-covered conveying rolls, steel and plastic gear wheels
- stainless steel heat treated spare parts: bottle slides, gear wheels, shafts
- stainless steel springing spare parts: transition slides for conveyors
- carbon steel spare parts, chemically cold-treated "blackfast"
- plastic spare parts: full assortment of wheels, rolls, sleeves

■ MANUFACTURING AND REGENERATION OF THE REMAINING SPARE PARTS

- fan impellers for special applications, made from stainless steel
- worms for transportation of mass and loose material, made from stainless and carbon steels
- movable elements of tracking platforms, pasteurizer grates
- surfacing by welding, covering with layers of technical chromium and ceramic coatings
- rubber covering of flat surfaces, shafts and sleeves
- cold "blackfasting" of elements, machinery and equipment parts

our customers

- Browar Kaliningrad**
transfer and restarting of Nagema line
lines overhauls, technical supervision
manufacturing of spare parts for bottling equipment
- Browar Belheim - Germany**
disassembly / transfer of the bottling line
disassembly / transfer of a complete set of bottling equipment
- Browar Wladimir - Moscow**
transfer / assembly and restarting of the bottling line
transfer / assembly and restarting of a complete set of bottling equipment
- Browar Elbląg**
assembling and overhauls of KHS bottling and canning lines
assembly of the PET Kronos bottling line
overhauls of the brewing and malting houses equipment
manufacturing of the technological media systems as well as the water conditioning PE station
manufacturing of the bottling tools
assembly of the Unitank systems and malt feeder system
manufacturing of spare parts
- Browar Warka**
overhauls of the KHS bottling line
overhauls of the brewing boilers
manufacturing of the technological systems
manufacturing of the new bottle tools
transfer the Brewery's water conditioning station
manufacturing of the main central heating centre designed for new brewing facility / house
manufacturing of the glycol main conduit
manufacturing of the trestle bridges for the Brewery's technological systems
manufacturing of spare parts
- Browar Leżajsk**
overhauls of the KHS bottling lines
manufacturing of the formatting tools for bottles of different shapes
manufacturing of the technological systems
manufacturing of spare parts for bottling lines equipment
complex assembly and modernization of the Haffmand's CO₂ recovery station
- Browar Żywiec**
manufacturing of the technological systems
- Browar Belgia - Kielce**
maintenance of the bottling lines, overhauls of the bottling lines
manufacturing of the technological systems
manufacturing of spare parts for the Brewery's technological equipment
- Browar Van Pur - Rakszawa**
assembly and overhaul of the bottling lines
manufacturing of spare parts
- Browar Heweliusz - Gdańsk**
overhauls of the KHS bottling line
manufacturing of the technological systems
manufacturing the tanks refilling station
manufacturing of the hydrophore system
overhauls of brewing boilers
manufacturing of spare parts for the Brewery's technological equipment
- Browar Braniewo**
overhauls of the KHS bottling line
manufacturing of the technological systems
manufacturing and assembly of the bottles, packing crates and pallets conveyors
manufacturing of the screw conveyors
manufacturing of spare parts for the Brewery's technological equipment
- Browar - Grudziądz**
overhauls of the bottling lines and equipment
manufacturing of spare parts for the Brewery's technological equipment
- Browar Kujawiak - Bydgoszcz**
manufacturing of the Unitank technological systems and filtration systems
manufacturing of the yeast propagation station as well as system of feeding and transportation of malt
manufacturing of spare parts for the Brewery's technological equipment
- Browar - Tychy**
overhauls of the bottling line
- Browar - Zielona Góra**
manufacturing of the technological systems
- Browar - Łomża**
manufacturing of spare parts for the Brewery's technological equipment
overhauls of the bottling lines and the bottling equipment
- Browar Amber - Bielskówo**
assembly of the Kronos bottling line
overhauls of the bottling lines
manufacturing of the technological systems
manufacturing of spare parts for the Brewery's technological equipment
